

## FOR IMMEDIATE RELEASE (English)

### Cargo Cycling Introduces the Chariot FS1 at EUROBIKE

Leading Dutch cargo bike brand, Cargo Cycling, is set to unveil its latest heavy-duty cargo trike, the Chariot FS1, at EUROBIKE 2023. With this ground-breaking release, Cargo Cycling establishes a new industry standard for large-volume e-cargo trikes.

The Chariot FS1 represents the pinnacle of next-generation e-cargo trikes. Engineered to effortlessly handle substantial volumes (up to 2000 L) and weights (up to 250 kg payload), it rides as smoothly as a standard two-wheel e-bike. How? The Chariot boasts a unique tilting mechanism that optimizes steering, corner stability, and user-friendliness. Specifically designed for low maintenance and maximum uptime, the Chariot FS1 excels in high-intensity city logistics.

#### Driven by Data and Innovation

Drawing on years of field experience and leveraging IoT devices and sensors, the Chariot FS1 is a product of data-driven innovation. This meticulous approach ensures that the Chariot FS1 exceeds the expectations of fleet owners and riders alike.

#### Unmatched Performance

By combining the distinctive tilting system with front fork suspension and independent rear wheel suspension and an intelligent programming of the Mando SPM pedalrite system, the Chariot FS1 offers a superior driving experience. With its low and flexible centre of gravity, the Chariot FS1 delivers swift and smooth cornering without the risk of tipping over.

#### Simplified Maintenance

The smart design of the Chariot FS1 reduces complexity and simplifies maintenance. Critical parts are easily accessible for repairs, ensuring quick and hassle-free servicing. The integration of in-house designed components and heavy-duty parts from the motorbike industry minimizes wear and tear. Equipped with an IoT module, an online maintenance platform enhances fleet management and driver safety, reducing downtime and maximizing uptime.

#### Tailor-Made Modular Cargo Solutions

The Chariot FS1's rear frame features a modular design, accommodating various cargo box solutions of up to 2m<sup>2</sup> and supporting a payload of up to 250 kg. Customization options for frame color and cargo box solutions are available, offering versatility to meet specific needs.

Quotes by some of the industry leading partners that have supported us in the development of the Chariot FS1:

*The Chariot FS1, a new generation eCargo trike, impressed me with its dynamic performance and spacious cargo area. It incorporates essential safety features and, when paired with the Mando SPM Pedalrite system, eliminates chain-related components for reduced operational costs and maintenance expenses. With these remarkable features, I believe the Chariot FS1 will establish a new benchmark in the eCargo market.*

*Jeff Chang, General Manager of Mando Corporation Europe GmbH*

*As usual, Cargo Cycling has managed to inspire the industry with its disruptive ideas. The Chariot FS1 is one of the most innovative vehicles on the market. We, the AES AKku Energie Systeme GmbH, are very proud to supply this fantastic vehicle with energy.*

*Matthias, Behlke, Managing Partner of AES AKku Energie Systeme GmbH*

*The new Chariot FS1 is the result of extensive real-world experience and data analysis. We take pride in supporting Cargo Cycling by gathering IoT usage data, feedback and maintenance insights. We firmly believe that the innovative Chariot FS1 offers an incredibly attractive overall cost of ownership.*

*Ward Grootjans, Managing Director of Get Bike Service*

## About Cargo Cycling and Nijland Cycling

Introducing Cargo Cycling, a renowned brand from Nijland Cycling, dedicated to empowering businesses in shaping a brighter tomorrow. Cargo Cycling provides an impressive line-up of electric cargo bikes tailored to address the varied requirements of forward-thinking business clients seeking zero-emission city logistics solutions. By developing innovative answers to the demands of customers committed to enhancing the efficiency, flexibility, and cleanliness of their urban logistics, we are here to make a difference. Join us in our journey.

Together. We Deliver!
